

TASK5-PREVENTION CHECKLIST

STAY SAFE ONLINE CHECKLIST FOR STUDENTS

- **Verify links before clicking:** Hover over URLs in emails/SMS—ensure they match official sites (not fakes). Avoid unsolicited "urgent" alerts.
- **Enable 2FA everywhere:** Activate two-factor authentication on email, UPI apps (e.g., Google Pay, PhonePe), and college portals for extra login security.
- **Use UPI safely:** Never share UPI PIN or OTP; set UPI limits (e.g., ₹5,000/day) in app settings and confirm payee name before sending money.
- **Keep apps updated:** Regularly update banking, college, and social apps to patch security vulnerabilities—enable auto-updates on Android/iOS.
- **Lock privacy settings:** On Instagram/LinkedIn, set posts to "friends only," hide personal info like phone/college ID, and review tagged photos.
- **Avoid public Wi-Fi for sensitive tasks:** Don't access UPI, bank apps, or submit assignments on college/cafe Wi-Fi; use mobile data or VPN.
- **Scan for malware:** Install reputable antivirus (e.g., Avast) and scan devices monthly, especially after downloading study PDFs or apps.
- **Spot phishing red flags:** Ignore demands for immediate action or rewards; forward suspicious SMS/emails to 7726 (SMS spam reporting).

If scammed: Report immediately at National Cyber Crime Portal (cybercrime.gov.in) or call Helpline 1930 for quick action and fund recovery. Stay vigilant—prevention beats recovery!
