

TASK2-DIGITAL PORTFOLIO

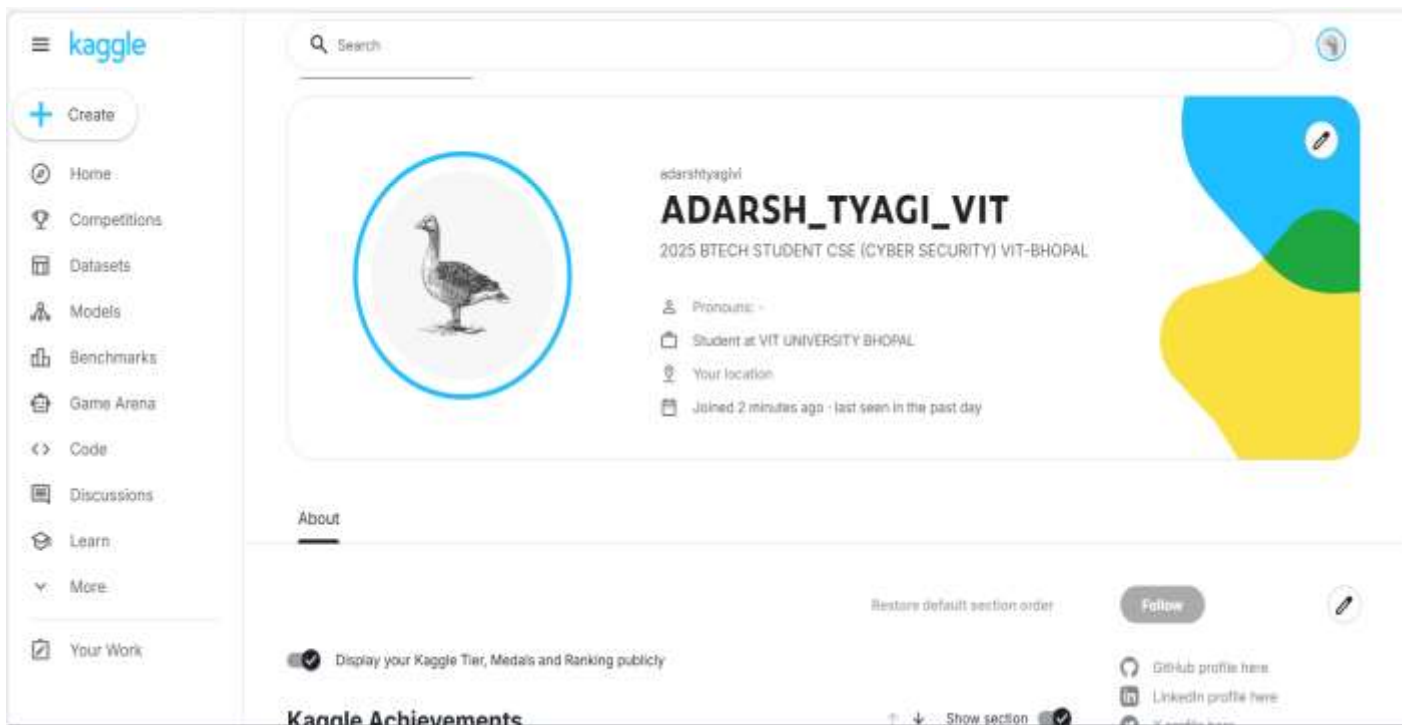

GITHUB

The screenshot shows a GitHub profile for the user 'adarsh25bcy10215-dot'. The profile includes a custom avatar, a bio stating 'BTECH COMPUTER SCIENCE SPECIALIZATION IN CYBERSECURITY COURSE PURSUING FROM VIT BHOPAL UNIVERSITY', and a list of popular repositories: 'AI-MIL-PROJECT1', 'PYTHON-VITYARTHI-PROJECT', 'FOODCOURTPROJECT2.0', 'DELIVERY-AGENT-AI-MODEL', 'Food_court_management', and 'AIML-VITYARTHI-PROJECT-25-NOV'. A contribution graph shows 30 contributions in the last year. The interface includes navigation links for Overview, Repositories, Projects, Packages, and Stars, along with a search bar and a 'Customize your pins' link.

LINKEDIN PROFILE

The screenshot shows a LinkedIn profile for 'ADARSH TYAGI', a student at VIT Bhopal University. The profile features a profile picture with the letter 'A', a bio, and a list of suggested connections including 'Sakshi Deshwal', 'Muskan Sharma', and 'Ujjwal Mahajan'. The interface includes a search bar, navigation links for Home, My Network, Jobs, Messaging, Notifications, and More, and a 'Profile language' dropdown set to English. The profile is public and has a URL: 'www.linkedin.com/in/adarsh-tyagi-772a553ba'. There are also buttons for 'Open to', 'Add section', and 'Enhance profile'.

KAGGLE PROFILE

Over the next four years, I'll leverage GitHub, LinkedIn and Kaggle to build my AI/ML and programming portfolios. On GitHub, I'll host python projects, Prolog experiments and collaborative repos for courses, tracking progress with commits.

Kaggle will sharpen my skills through datasets, notebooks, and competitions in data science, earning badges for resumes.

LinkedIn will network with recruiters, alumni and pros, sharing projects and seeking internships in cybersecurity or AI.

Together, they'll boost internships, placements and skills amid college challenges.
